

Digital Triage.

Fast. Affordable. Field-Ready.

Purpose-built triage software for law enforcement agencies.
Scan targeted locations for contraband and investigative leads —
not entire drives. Get actionable results in minutes, not hours.

60-DAY FREE TRIAL

No credit card required.
Full feature access included.

Browser History

Extract & analyze browsing data, URLs, and search terms from target devices.

Hash Matching

Cross-reference files against known-contraband hash lists. Instant flagging.

Keyword Search

Run keyword lists against file names, paths, and artifacts for targeted leads.

Media Compilation

Compiles images & videos from common contraband locations into one review interface.

Intrusion Scanning

Detect unauthorized access, suspicious apps, and anomalous system activity.

PDF Reports

Court-ready reports with evidence thumbnails, hashes, and case metadata.

Scout Is a Triage Tool — Not a Forensic Imager

It scans targeted locations where contraband is commonly stored — giving investigators fast, actionable leads without full-disk forensic overhead.

HOW IT WORKS

01

Download & Install

Download the Windows installer from dp scout.com. Run setup — no complex configuration.

02

Register Your Agency

Enter agency details on first launch. Your 60-day trial starts immediately. Full access.

03

Start Investigating

Connect a device, import hash lists, and scan. Generate reports when you find leads.

WHAT SCOUT SCANS

- ✓ Browser history & search terms
- ✓ File names, paths & metadata
- ✓ Known-contraband hash databases
- ✓ Images & videos in targeted locations
- ✓ Keyword matches across artifacts
- ✓ USB device connection history
- ✓ Installed applications list
- ✓ System intrusion indicators

SUPPORTED DEVICES

USB Storage

Thumb drives, external HDDs, SD cards

Android Devices

Photos, SMS, browser, app artifacts via ADB

Windows PCs

Local system triage and artifact scanning
